

NJV Athens Plaza Hotel constantly envisions the sustainable development of tourism. In the context of orderly and efficient operation of sustainability, the hotel developed an Environmental Management System according to ISO 14001 and an Energy Management System according to ISO 50001 in order to reduce, minimize and manage its impact on the environment while at the same time contributing to the effort to reduce energy consumption and of emitted pollutants related to its activities.

By developing environmental management processes, the hotel determines all environmental aspects of its activities and establishes policies and programs aimed at the continuous improvement of its environmental performance and results.

For this reason, management is committed to:

- comply with the law, rules and regulations related to the hotel's activities and have an impact on the environment and energy management,
- evaluate the effects of the hotel's activities on the environment, with the aim of minimizing or eliminating any harmful consequences,
- aim at the continuous improvement of environmental and energy best practices, through the establishment of new objectives and through continuous research,
- work closely with the local government, the authorities and the local community to make decisions concerning the protection of the environment and energy management,
- actively participate in protecting the environment, avoiding pollution and reducing energy waste,
- manage the generated waste rationally, with priority given to its separate collection and recycling,
- save resources through the development of a system for monitoring the consumption of natural resources and contribute to the responsible use of energy,
- keep the staff informed on environmental and energy management issues.

This company policy is published, communicated, implemented and supported by every employee in the company.

The General Manager
