

Biodiversity Protection Statement

Coral Sea Hotels & Resorts is committed to protecting and enhancing biodiversity in all locations where we operate. We aim to minimize our impact on natural environments and promote ecological balance through sustainable landscaping, pollution control, education, and conservation partnerships.

We committed to:

- Avoid sourcing or selling products that negatively affect biodiversity.
- Support and participate in biodiversity conservation efforts.
- Educate staff, guests, and suppliers on biodiversity protection.

Coral Sea Hotels and resorts Biodiversity Strategy:

1. Landscape Management, we do not undertake development or landscaping within protected, ecologically sensitive areas. Instead, we use native plant species to minimize water use, preserve natural ecosystems, and support local biodiversity.
2. Pollution Prevention, we ensure all wastewater and chemicals are managed to prevent environmental harm by installing proper filtration systems and avoid harmful pesticides and fertilizers.
3. Procurement, we do not purchase or sell products that harm biodiversity (e.g., endangered species, coral, unsustainable seafood).
4. Staff and Guest Engagement, we Integrate biodiversity awareness into training and guest information.
5. Biodiversity activities, we collaborate with local authorities on biodiversity initiatives Support local clean-up events.
